JONATHAN HUMBLE NAMED AS HONORARY MEMBER OF INTERNATIONAL CODE COUNCIL

WASHINGTON, D.C. – Jonathan Humble, FAIA, NCARB, LEED BD+C, regional director of the American Iron and Steel Institute’s (AISI) Construction Technical Program, was installed as an Honorary Member of the International Code Council (ICC) on September 20, 2021 during the ICC’s Annual Conference and Public Comment Hearings at the David L. Lawrence Convention Center in Pittsburgh, PA. This recognition is bestowed on an individual who has rendered outstanding service to the ICC.

“We congratulate Jonathan on this recognition by the International Code Council,” said Robert J. Wills, P.E., AISI’s vice president, construction. “Over the years, Jonathan has made many important contributions utilizing cold-formed steel to advance building performance and enhance safety measures. He joins four other AISI employees who received this honor in previous years: Daniel McGee, James Spence, Henry V. Kominek and Richard A. Vognild.”

AISI’s Construction Technical Program staff work diligently to ensure that building codes and standards reflect state-of-the-art industry practices, are technically sound, permit the proper and safe use of steel, and promote the recognition of concepts favorable to steel.

AISI serves as the voice of the American steel industry in the public policy arena and advances the case for steel in the marketplace as the preferred material of choice. AISI’s membership is comprised of integrated and electric arc furnace steelmakers, and associate members who are suppliers to or customers of the steel industry. For more news about steel and its applications, view AISI’s website at www.steel.org and www.buildusingsteel.org. Follow AISI on [Facebook](#), [LinkedIn](#), [Twitter \(@AISISSteel\)](#), [@BuildUsingSteel](#) or [Instagram](#).
